To Our Friends and Patrons.

We take pleasure in handing you herewith our "Annual Catalogue."

We offer our seeds with the full assurance that they are true and reliable, quality being always our first consideration, but at the same time we wish it particularly understood that we do not warrant them, for the ultimate success of a crop is dependent on so many contingencies, that we cannot hold ourselves liable or responsible for failures. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

In ordering goods please give your Name, Post Office and State in full, being particular to write your name very distinctly.

Remittances can be made by Post Office, Money Orders, Bank Drafts, Express Orders, or cash sent in registered letter.

Orders from unknown correspondents must be accompanied by a remittance or a satisfactory reference.

When ordering seeds by mail, postage must always be added at the rate of eight cents per pound, in quantities of one-fourth pound and upwards. Seeds by packet, and ounce, will be mailed without extra charge.

In shipping we make no charge for delivery to railroads or express companies.

We are thankful for the generous patronage heretofore given, and intend to continue to merit the same by exercising the utmost care and fidelity in promoting the interests of our customers.

R. B. DUNNING & CO.

LIBERAL REDUCTION TO CLUBS.

Liberal reductions will be made to persons selecting packet seeds from our Catalogue, at the prices named, and will be forwarded, postage free to any part of the United States.

Purchasers remitting \$1.00 may select seeds in packets, at Catalogue prices

| | | | | | | | amounting to | 51.25 |

This reduction is for packet seeds only. Seeds when ordered by the ounce or pound will not be included.

SELECTED NORTHERN GROWN VEGETABLE SEEDS.

BEANS-Dwarf or Bush.

One quart is sufficient for one hundred feet of drill; two bushels for one acre in drills.

A succession of sowings can be made from the first week in May until July. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil, the closer they can be planted; the plants should be about three inches apart.

Beans ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

Dwarf Wax Beans.

| | D1 4 | 04 | 701 |
|---|------|-----|----------------|
| | Pkt. | Qt. | Pk. |
| Dwarf Horticultural. A fine early shell bean | 5 | .20 | 1.25 |
| Henderson's Dwarf Lima. Productive and early | 5 | .30 | 2.00 |
| Currie's Rust Proof. Straight, yellow, stringless pod. Unsurpassed for quality | . 5 | .25 | 1.50 |
| Improved Golden Wax. An improvement on the old Golden Wax. The pod is somewhat round, | | | |
| meaty, and entirely rust proof | 5 | .25 | 1.50 |
| Golden Eye Wax. A hardy handsome wax bean. Rust proof; the best variety for market garden | 5 | .25 | 1.50 |
| Refugee Wax. Long, round, yellow wax pods, very productive, and not inclined to rust | | | |
| Low's Champion. Large, green, flat, stringless, and extremely tender pods. As a shell bean it has but | | | alitie gask |
| few equals, and is of splendid flavor when cooked dry. | | .25 | 1.50 |

| Cleveland's Improved Valentine. One of the most | Pkt. | Qt. | Pk. |
|---|------|-----|------|
| popular of all the varieties of bush beans | | .20 | 1.25 |
| Long Yellow Six Weeks. Hardy and prolific, an | | | |
| excellent early string bean | 5 | .20 | 1.25 |
| Red Kidney. Excellent for baking | 5 | .20 | 1.00 |
| Improved Yellow Eye. Very prolific; fine for | | | |
| baking | 5 | .15 | .75 |
| Improved White Pea. Excellent for baking | | | |

BEANS-Pole or Running.

One quart will plant one hundred hills; ten to twelve quarts to the acre.

These are more tender, and require rather more care in culture than the bush beans; they succeed best in sandy loam, which should be liberally enriched with short manure in the hills, which are formed according to the variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep.

Beans ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

| Horticultural Pole. The most popular variety for both string and shell beans |
|--|
| Mammoth Horticultural. An improvement over the common Horticultural, being very much larger and much more productive. As a market shell bean it has no equal |

| superior quality 5 .30 2.00 |

BEET.

One ounce to fifty feet of drill; six pounds to the acre.

The best results are obtained on a deep, rich, sandy loam. For early use sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

Dewing's Early Blood Turnip Beet.

| | Pkt. | 2 Oz. | ¼ lb. | Lb. |
|---|------|-------|-------|-----|
| Egyptian Blood Turnip. Very early and of rapid growth; color, deep crimson. A valuable market variety | 5 | .10 | .20 | .60 |
| | | | | |
| Eclipse. This variety is about as early as the Egyptian, but larger and of finer quality | 5 | *.10 | .20 | .60 |
| Bastian's Early Blood Turnip. Larger than the Egyptian, and follows it and the Eclipse in | = | 10 | 90 | 00 |
| point of earliness; not so dark in color | 9 | .10 | .20 | .60 |
| Dewing's Blood Turnip. Of fine form and flavor and deep blood red; a desirable variety | 5 | .10 | .20 | .60 |
| Long Smooth Blood Red. This is a long, smooth beet, growing to good size | 5 | .10 | .20 | .60 |
| Edmand's Early Blood Turnip. The best sort for general crop. In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Very popular with market | | | | |
| men | 5 | .10 | .20 | .60 |

Red, very large.....

| Varieties Grown for Feeding Stock. (Sown in May or I | Early | in Jun | ne.) |

| Golden Tankard. A half long variety of a bright yellow color | .10 | .15 | .50 |
| Norbiton Giant Mangel Wurzel. Extra fine Long | | | 1 |

.10 .15 .50

Fottler's Improved Brunswick Cabbage.

CABBAGE.

One ounce will produce about three thousand plants.

The Cabbage is one of the most important vegetables, and some of its varieties, universally cultivated. The ground must be highly manured, deeply dug or plowed, and thoroughly worked, to insure good,

full sized heads. A heavy, moist and fresh loam is the most suitable. The early sorts should be sown very early in the spring, in hot-beds, or later in the open ground. Eighteen inches by three feet apart is the common distance.

| Early Winningstadt. An excellent sort; heads of large size | | D1-+ | 0.7 | 1/ lb | |
|--|--|------|-----|-------|---|
| Early Jersey Wakefield. This is the standard early pointed-head cabbage. For the market garden it is the best, and for early home use all should have it 5 .20 .60 Henderson's Early Summer. The standard summer variety. Unexcelled for the market garden and good for home use | | | | | |
| variety. Unexcelled for the market garden and good for home use | Early Jersey Wakefield. This is the standard early pointed-head cabbage. For the market garden it is | 5 | .20 | .60 | |

| | be distinguished anywhere | 5 | .20 | .60 | |

CARROTS.

One ounce to one hundred feet of drill, three to four pounds to the acre.

Carrots require a very finely pulverized soil, to grow them to perfection. A good, light and well enriched sandy loam is the best for this crop. For field culture, sow in drills, three to three and one-half feet apart, so as to cultivate by horse. Market-gardeners sow in drills about eighteen inches apart, and cultivate by hand. For early crops,

cover one-half an inch deep, and thin to six inches apart in the rows; for late, cover three-fourths of an inch deep, and thin to four inches.

Ox Heart Carrot.

| is of a dark orange color and grows very smooth. | Ę. | 15 | กร | 75 |
| Very productive | J | .10 | .20 | . (0 |
| Thick and short in form, scarlet in color | 5 | .15 | .25 | .75 |

CAULIFLOWER.

One ounce will produce about three thousand plants.

Any soil that will grow early Cabbages will grow Cauliflower, as their requirements are almost similar; but as the product is more valuable, extra manuring and preparation of the soil will be well paid.

The seeds may be sown in the hot-bed in March or April, and transplanted to open ground about the first of May

| | | | | | Pkt. | Oz. |
|-------------------|-----------|--------------|------|----------------|------|------|
| Henderson's Early | Snowball. | \mathbf{A} | very | reliable early | | |
| variety | | | | | | 2.00 |

CELERY.

One ounce of seed produces about four thousand plants.

To have celery early, it should be sown in a hot-bed, quite early in the spring, and when three inches high, plant out in a well-prepared bed, which must be covered in frosty weather. For the principal crop, sow early in spring, very shallow in the seed-bed, and when the plants are about six inches high, transplant them six inches apart into trenches for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the center of the plants.

| | Pkt. | Oz. |
|--|------|-----|
| Boston Market. A favorite variety, remarkable for its ten- | | |
| der, crisp, succulent stems, keeps well | 5 | .25 |
| Henderson's White Plume. Crisp, solid and possessing | | |
| a sweet, nutty flavor; requires very little labor in bleaching | 5 | .25 |
| Golden Self-Bleaching. A self-bleaching, early golden- | | |
| colored variety that is very popular | 5 | .25 |

Corv Corn.

CORN-Sweet.

One quart to two hundred hills, ten quarts to an acre.

The Sweet or Sugar varieties being liable to rot in cold or wet ground, should not be planted before the middle of May, and for a succession continue planting every two weeks, until July, in rich, well-manured ground, in hills three feet apart each way, covering about half an inch, and thin out to three plants to a hill, or plant in rows four feet apart, and to stand eight inches apart in the rows.

The field varieties should be planted four feet apart each way, leaving three plants to a hill.

Corn ordered by mail is subject to an extra charge of ten cents per quart for postage. Pints furnished at quart rates.

| Cory. Very early dwarf variety; an excellent | | Qt. | Pk. | Bu. |
|--|---|-----|------|------|
| sort, sweet and of rich flavor | | .20 | 1.00 | 3.50 |
| Early Marblehead. This resembles very close- | | | | |
| ly the Cory, but is not so early | 5 | .20 | 1.00 | 3.50 |

| CORN—Sweet—Continued. | | | | | |

| Forty Vollage Canada A your could sight yourd | Qt. | Pk. | Bu. | | |
| Early Yellow Canada. A very early eight-rowed variety | .10 | .50 | 1.75 | | |
| Red Cob Ensilage. A pure white corn. It is sweet, tender and juicy, has short joints, grows to a great height with an abundance of leaves | 10 | .35 | 1.25 | | |
| Evergreen Sweet Fodder. For cutting green and | .10 | .00 | 1.20 | | |
| feeding to stock this variety excels all others in ten- derness, sweetness and nutriment. Also popular as | | | | | |
| a silo variety | .10 | .50 | 2.00 | | |

CRESS OR PEPPER-GRASS.

A well known salad. Requires to be sown thickly and covered very slightly. Sow at frequent intervals to keep up a succession, as it soon runs to seed.

Double Curled. Very fine; may be cut two or three times. 5 .15

Improved Long Green.

CUCUMBER.

One ounce to fifty hills.

The Cucumber is a tender annual, and therefore should not be planted or set out in the open air until there is a prospect of continued warm and pleasant weather. Cucumbers succeed in warm, moist, rich loamy

| track protection of decimation of the contraction o | -, | , - | | V |

| ground. The hills should be four or five feet apar | t in | each | direct | ion. |
| When all danger from insects is passed, leave but t | hree | or fo | our of | the |
| strongest plants in the hill. | | | | |
| • | Pkt. | Oz. | ¼ lb. | Lb. |
| Early Russian. The earliest variety | 5 | .10 | .25 | .75 |
| Early Frame. An early standard variety; about | | | | |
| five inches long | 5 | .10 | .25 | .75 |
| Improved White Spine. Superior for table use, very productive, medium sized, straight and well | | | | |
| formed | | .10 | .25 | .75 |
| Early Green Cluster. Grows in clusters, early | , | | | |
| and productive | | .10 | .25 | .75 |
| Improved Long Green. Long and crisp; a | | | | |
| popular and reliable variety for pickles | | .10 | .25 | .75 |
| Boston Pickling. The finest variety to grow for | | | | |
| pickles | 5 | .10 | .25 | .75 |
| Everbearing. Medium size, early, productive excellent for either the table or for pickling. Its peculiar merit is that the vines continue to flower | | | | |
| and produce fruit until killed by frost | | .10 | .25 | .75 |
| | | | | |

One ounce to one hundred feet of drill.

The Dandelion resembles Endive, and affords one of the earliest, as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows twelve inches apart, covering seed one-fourth of an inch deep, the earth firmly pressed over the seed.

DANDELION.

Improved Thick-Leaved. The best variety 5 .40 1.50 5.00

LETTUCE.

One ounce to one hundred and twenty feet of drill.

Lettuce thrives best in rich, moist ground. Sow the seeds in hot-beds in February or March, and transplant into a sheltered border with a southern exposure. For successive crops, sowing may be made in the open ground as early as the spring opens, and continuing until July.

| F-1- 71-11 With 11 0 (1) | | Oz. | 1/4 lb. |
|--|---|-----|---------|
| Early Tennisball. White seeded. One of the earliest and best heading varieties | | .15 | .50 |

Yellow Globe Danvers Onion.

ONION.

One ounce to one hundred feet of drill; five pounds to the acre.

No vegetable is more extensively known and cultivated than the Onion. A good crop is impossible unless the soil is very rich and kept clean. Use well-rotted manure freely, and get the crop in as soon as possible in spring, no matter if the weather is cold and unpleasant. Sow in drills one foot apart, and cover about one-third of an inch, treading or rolling after sowing, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed.

| | Pkt. | Oz. | ¼ lb. | Lb. |
|---|------|-----|-------|------|
| Large Red Wethersfield. Large size, productive and a good keeper | 5 | .20 | .75 | 2.50 |

PARSLEY.

One ounce to one hundred and fifty feet of drill.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart, and half an inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect it in a glass frame or light cellar.

| | | | | ¼ lb. |
|--------|--------|---|-----|-------|
| Double | Curled | 5 | .10 | .25 |

PARSNIP.

One ounce for two hundred feet of drill; five pounds to the acre.

Sow as early in the spring as the weather will admit, in drills fifteen inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frosts, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

| | Pkt. | Oz. | ¼ lb. | Lb. |
|---|------|-----|-------|-----|
| Abbott's Improved, or Long Smooth. Smooth | | | | |
| and quite large; one of the best | 5 | .10 | .25 | .75 |

PEAS.

One quart to seventy-five feet of drill; two to three bushels to the acre.

Peas for an early crop should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crops the ground should be well manured the previous year which causes them to yield more abundantly. When grown as a market

crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

Peas ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

Extra Early Varieties.

| Cleveland's Alaska. The earliest variety known, smooth, blue, prolific and sweet. Height | Pkt. | Qt. | Pk. | Bu. |
|--|------|-----|------|------|
| two feet, very desirable for early market gar- dening | 5 | .20 | 1.25 | 4.00 |
| Nott's Excelsior. One of the most valuable of all the wrinkled dwarf peas. As early as the American Wonder, while the pods are larger, fully as well filled, and there are more of them. | | | | |
| It grows a half taller than the American Wonder and is a much heavier cropper | 5 | .30 | 2.00 | 8.00 |
| Bliss' American Wonder. One of the earliest and best known wrinkled dwarf varieties, grows about nine inches high, and is covered with well | | | | |

PEPPER.

One ounce will produce fifteen hundred plants.

Grown largely for pickles. Sow in the hot-bed early in April, and transplant into the open ground when the weather is favorable. The plants should be set in warm, mellow soil, in rows eighteen inches apart. The seed may also be sown in the open ground when danger from frost is passed, and the soil is dry and warm. Cultivate in the usual manner, and the crop will be fit for use early in September.

Harmony Beauty.

POTATOES.

Harmony Beauty. This Potato originated from the seed of a Potato ball in Somerset county, Maine.

It is the favorite Market Potato of Bangor, having the preference over all other varieties wherever once used, and conceded by growers and consumers to be the best potato grown. It always brings a better price than any other in our market.

It is a prolific cropper and remarkably free from rot, and about two weeks earlier than the Early Rose. Planted side by side with the New Queen last season we found it excelled that favorite Potato in every way.

In appearance it has a russet pinkish skin a little lighter in color than the Early Rose and is of more oval shape. Flesh white and mealey.

New Queen. From a seed ball of the Beauty of Hebron, resem-

bling it in color and shape. Early as the Rose, and a very productive potato and good keeper. Table qualities unsurpassed.

| | Pkt. | ¼ lb. | Lb. |
| Sugar. Fine grained, sweet and prolific | - 5 | .25 | .80 |

RADISH.

One ounce for one hundred feet of drill.

Radishes thrive best in a light, rich, sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior, both in appearance and flavor. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February.

| | Pkt. | Oz. | ¼ lb. | Lb. |

Hubbard Squash.

SQUASH.

One ounce of summer varieties will sow forty hills; one ounce winter varieties will sow fifteen hills; four pounds per acre.

Any good rich soil is adapted to the growth of the Squash. They only thrive well in a warm temperature, as all the varieties are tender annuals; and the seed should not be sown in spring until all danger from the frost is past, and the ground is warm and thoroughly settled. The hills for bush varieties should be about six feet apart, for running sorts, ten feet. Leave two plants to a hill and keep covered in the early stages with plaster.

| | Pkt. | Oz. | ¼ lb. | Lb. |
|---|------|-----|-------|-----|

| of good flavor | 5 | .10 | .25 | .75 |

TOMATO.

One ounce will produce fifteen hundred plants. This vegetable is one of the most important of all garden products. They thrive best in a warm, light rich soil. For early plants, sow about the first week in

March in a hot-bed, or in boxes or pots in a warm window. When the plants are about two inches high, set out in boxes, three inches deep, four inches apart, in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Keep well sheltered and watered until they are established, after which let the fruit have plenty of sun.

Livingston's Beauty Tomato.

| | | Oz. | ¼ lb. |
|---|---|-----|-------|

| quality | 5 | .25 | .75 |

TURNIP.

One ounce for one hundred and fifty feet of drill; one to two pounds in drills for an acre.

Turnips do best in highly enriched, light, sandy or gravelly soil; sow

the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for fall and winter use. Swedish or Ruta Baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the 10th of June until the 1st of July, in drills two to three feet apart, and the plants when well up should be thinned to ten inches apart. They are best preserved in a pit or cellar during the winter, and are excellent for the table early in spring.

BRADLEY'S CONCENTRATED FLOWER FOOD.

For house plants and florists' use.

This food is composed of all the constituents requisite for perfecting the growth of all Flowering Plants.

One pound, 10c. Three pounds, 25c.

FLOWER SEEDS.

NASTURTIUM TALL.

Elegant profuse flowering plants for verandas, trellises, etc. The seed pods can be gathered while green and tender, for pickling. Hardy annuals.

NASTURTIUM DWARF.

The dwarf varieties are among our most popular plants, standing any amount of heat and drought, growing vigorously and flowering freely all summer and fall; excellent for massing and ribboning, doing well even in poor soil. Hardy Annuals, 1 foot.

Dwarf Mixed. Fine colors...... 5 10

SWEET PEAS.

Very lovely, beautiful, fragrant, free blooming, climbing plants. Sweet Peas are grown very extensively by florists and gardeners for cut flowers, and when placed in water will last many days, and their sweet perfume delights many.

Supported by common pea sticks they form admirable screens for protecting tender plants and excluding unsightly objects. They are invaluable for trailing and trellis work and covering fences, etc. .

The more the flowers are cut the more freely they will bloom.

We carry a complete line of other varieties of Flower Seeds put up by some of the leading seed growers.

GRASS SEEDS.

At market prices at time order is received. All inquiries for quotations will be promptly answered.

Timothy or Herd's Grass. The best grass for hay; 45 lbs. to the bushel.

Red Top. A valuable grass and extensively cultivated; 10 lbs. to the bushel.

Fancy Red Top. Clear seed.

Rhode Island Bent. Very fine lawn grass; 10 lbs. to the bushel.

Orchard Grass. Valuable on all dry soils, very valuable as a pasture grass; 14 lbs. to the bushel.

Fowl Meadow Grass. Grows tall and thick, succeeding best on low moist land; 10 lbs to the bushel.

Kentucky Blue Grass. An excellent variety for pasture. Also valuable for lawns when mixed with other grasses; 14 lbs. to the bushel.

MILLETS.

Millets should be sown in June and July, and are annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay. Prices subject to market changes.

Hungarian Grass. Early; grows two to three feet high; abundant foliage; withstands drought and yields well on light soils.

Golden Millet. Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stocks and leaves, and is excellent for foraging.

CLOYERS.

Prices subject to market changes.

There are no plants so valuable for fertilizers as the clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil. The

seed may be sown in fall or spring; the best results will come from sowing in the spring, and it is often sown on the late snows of April.

Medium Red Clover.

Pea Vine or Mammoth Clover.

Alsike Clover.

White Dutch Clover. Valuable for pasture and for lawns.

Scarlet or Crimson Clover. This variety is fine for soiling cattle; has a beautiful blossom.

GRAINS.

Prices subject to market changes.

Wheat, Spring Rye, Winter Rye, Barley, Oats, Silver Hull Buckwheat, Common Buckwheat, Indian Wheat or Rough Hulled Buckwheat.

All our grains are selected expressly for seed, and are strictly pure and true.

All inquiries for quotations for grass seeds, grains, etc., will be promptly answered, and samples sent by mail when desired.

DUNNING'S LAWN GRASS SEEDS.

One Pound Will Sow Four Hundred Square Feet.

This is a mixture of the different varieties of grass seed, which is best suited to this climate for lawns, grass plots, cemetery lots, etc.

A liberal quantity of seeds should always be used to insure the best results. Per pound, 25 cents. If sent by mail, add eight cents per pound for postage.

ENGLISH LAWN FERTILIZER.

An Odorless Chemical Fertilizer for Lawns, Flower Beds and Kitchen Gardens.

This is a high-grade chemical fertilizer, especially prepared to promote the vigorous and healthy growth of luxuriant grass, enabling it to withstand rough usage and the protracted heat of summer.

Being free from weed seeds, and odorless, it is far superior to unsightly and strong-smelling stable dressing for use on lawns and tennis courts.

| Ten pound bags for 250 square feet | \$.50 |
|---|--------|
| Twenty-five pound bags for 600 square feet | 1.00 |
| Fifty pound bags for 1200 square feet | 1.50 |
| One-hundred pound bags for 2500 square feet | 2.50 |

are without doubt the best fertilizers in the world for producing the largest possible crops of Grass, Grain, and Vegetables in the shortest time. The Bradley Fertilizer Co. manufacture fertilizers of all grades, and for all crops; and, being the largest manufacturers in the world, their facilities for furnishing all kinds of fertilizers and agricultural chemicals at the lowest prices are absolutely unequalled.

Their leading brands are

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world. From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise—"the Old Reliable."

As it is a complete fertilizer, rich in available phosphoric acid, ammonia, and potash, it can be used either with or without barnyard manure.

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced "special potato manures" whose alleged scientific combination is their principal claim to the farmer's patronage.

BRADLEY'S COMPLETE **MANURE**

For Potatoes and Vegetables, Corn and Grain, Top Dressing Grass and Grain.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Bradley's Complete Manures are in the fullest sense "complete" fertilizers, and the three grades furnish complete plant food in the best forms for all crops grown.

Send to us for finely illustrated pamphlets, describing all of their brands, and let us quote you prices on these unequalled fertilizers before purchasing elsewhere.

is beyond question the best food ever manufactured for Hens, Turkeys, and Ducks. Its continual use by the largest Poultry Raisers proves it is unequalled for quickly growing largesized birds of fine flavor, and for producing large yields of superior quality eggs.

The Worcester Buckeye Mower.

New Chain Gear Mower.

♦ THE LIGHTEST DRAFT MOWER №

EVER PUT IN GRASS.

The Buckeye has always been popular for its durability. The mechanical principles on which its general designs rests, were proved correct and desirable many years ago and these are unchanged. Its general adoption in New England and its steady and increased growth of sales, in face of the sharpest competition, are a sufficient demonstration of its superior merit.

The Buckeye will meet the most exacting demands in every variety of grass-

cutting.

Send for descriptive Catalogue and Price List. We carry a complete line of repairs for the Buckeye Mower.

SECTIONS.

We carry a full line of sections for all the leading mowers.

Farmers can have their orders promptly filled by sending directly to us for sections for all kinds of machines.

In ordering be sure and send size of section wanted.

Save Money by Ordering Sections From Us.

PRICE—Sections, any kind, 6 cents each; in boxes of 25, 5 cents each, rivets included.

New York Champion Horse Rake.

The NEW YORK CHAMPION RAKE Has Many Imitators, But No Equals. WHY IT TAKES THE LEAD!

It has our patent tooth to prevent scratching.

It has no springs to get out of order. It produces no jar on the thills when dumping. Its thills work as freely as those on a carriage.

It will not scratch up fine seeding.

It will run over trash lying on the ground and leave it there.

It is so easily managed that a boy who can drive a horse, can use it as well as a strong man.

It can be held down to make very large windrows, or bunch them up.

It is very easy to keep the teeth up after going over a windrow. It dumps damp part of windrow on top, and saves use of hay tedder.

Our patent oscillating cleaner has a spur pointing downward on each end pin, and is the only device that fully prevents the hay from rolling and working into the wheels. The cleaner raises gradually as the teeth fill, and by its weight gives a compact windrow, slid-not rolled together, which is left thoroughly bottom side up, damp part on top and exposed to sun and wind.

Every Rake Warranted. Price \$20.00.

Bullard's Improved Hay Tedder

FOR TURNING AND SPREADING HAY.

The Bullard Improved Hay Tedder having been submitted to the severest test of field work, is admitted to be the only one yet offered to the public that will thoroughly spread long, heavy grass, taking it up from the bottom, tossing it gently into the air, and leaving it light upon the ground for free access of sun and air.

The Bullard Tedder has outlived scores of experimental machines and is the only Tedder that has stood the tests of time.

Write for Prices.

The DOLLAR MOWER KNIFE SHARPENER

Is the handiest and best tool for sharpening MOWER KNIVES. With it the sections can be ground back to the angle, and the knife sharpened in the field. It is to the Mower Knife what the whetstone is to the scythe. No water required. Will not glaze. Saves its cost in one day's use.

Price \$1.00. Extra Stones 40 Cents.

The New Dutton Knife Grinder.

This is the latest and undoubtedly the best tool for sharpening mower knives

that has ever been placed on the market.

It has a "corundum grinding wheel," which works perfectly. It wears but little, and it will last, according to the amount of work done, from three to five

The grinder is readily clamped to the wheel of any mowing machine, and with it any kind of a mower knife can be ground, whether the sections are long or short.

Clough's Adjustable Sieve.

In offering this Adjustable Sieve to farmers and others, we know that they will find it useful and valuable for separating foul seeds from grain, and sifting out the small grains, thereby getting the most vigorous kernels for seed: also for cleaning and sorting Beans, Peas, etc.

Price, - \$1.75.

Mounted GRINDSTONES.

Mounted With Specially Selected Stone.

This frame is made of seasoned hardwood. The legs are securely gained into the side pieces and the ends are in one piece. Two bolts at each end pass through the entire frame from side to side. The ends of the side bars are neatly turned to serve as handles.

The "SAMSON" being strongly braced and bolted, stands absolutely solid. It is one of the strongest and most showy frames made.

When not otherwise ordered, we ship Mounted Grindstones knocked down, If desired set up, it should be so specified.

UNMOUNTED GRINDSTONES

Price, Per Pound, 11-2 Cents.

We carry in stock a fine assortment of unmounted stones of superior quality. Specially selected Nova Scotia grit.

The Kemp Manure Spreader.

The Kemp Manure spreader will evenly and thoroughly spread all kinds of manure found upon the farm, from the roughest and toughest down to the finest, including ashes in all conditions, wet or dry, and the time required to spread a load is from one and a half to two minutes, without manual labor. It can be regulated to spread different quantities of manure to the acre.

Send for Descriptive Circular and Price List.

The "King of the Cornfield"

CORN PLANTER AND FERTILIZER DISTRIBUTOR.

Superior to all for Planting Field Ensilage and Fodder Corn, Broom Corn, Beans, Peas, Beets and Other Seeds of Like Size.

This planter is perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, in consequence of its having no gears, chains or other complicated parts to break or wear out. Anyone can at once understand and manage it. An important feature in this planter is that none of the working parts, except the Drive Wheel, are in motion only at the instant the seed and fertilizer is dropped in the hill, then it remains still until the next hill is reached. Corn planted by this machine germinates much quicker and comes up much more uniformly than if planted by hand.

Circulars and price list mailed on application.

Racine Broadcast Seeder.

It will sow perfectly any quantity to the acre of all kinds of grain. Wheat. Oats. Barley, Rye, Buckwheat, etc., or Grass Seeds. Clover Millet, Timothy, Hungarian, etc. It will also sow Flax Seed, Hemp Seed, Peas, Corn and fertilizers, in fact anything which re-

quires broadcasting, in a most satisfactory manner. It is the latest Wagon End Seeder on the market, and superior to all others. It is heavier and stronger than any other seeder in use.

PRICE, \$10.00.

Send for descriptive circular.

PEARCE'S IMPROVED

Seed Sower

For sowing Wheat, Barley, Oats, Buckwheat, Rye. Grass Seed. Etc. Sows from four to eight acres per hour, at a common walking gait, throwing out wheat about forty feet wide.

A person entirely unused to sowing by hand can use this machine with perfect success.

Price, \$3.50.

Steel Frame Lever Cultivator.

This is the best Lever Cultivator ever put on the market for the money.

Made with stiff heavy steel frame, steel wheel straps, strong, durable and steady running.

SYRACUSE - STEEL - FRAME - CULTIVATOR.

No. 26.—Five 3 inch Points and Wheel. (See cut,).................................\$3.50
No. 28.—Same as No. 26 with Wing Points and Shovel Point added............ 4.00

Syracuse Steel Frame Cultivator.

All parts adjustable. Long stiff frame. Strong and durable. The wing points can be quickly changed to throw more or less earth to or from the crop.

No. 53,—Five 3 inch Points, Wing Points and Shovel Point.......\$4.00

SYRACUSE SPRING TOOTH CULTIVATOR.

This series of Cultivators is especially adapted for use in stony ground. The frames are steel, strong, and well put together throughout. The castings are malleable. The teeth are fine oil tempered springs, and are alike and interchangeable; they are also adjustable for angle and depth.

The "PLANET JR." Cultivator.

The "PLANET JR." No. 6 All Steel Horse Hoe and Cultivator.

Perhaps no single cultivating tool now made is so widely and favorably known as the "Planet Jr." Combined Horse Hoe and Cultivator. The improvements have been very gradual, but at the present time its adaptability to almost every locality and crop is thoroughly proven by its extensive use, for the trade-mark "Planet Jr." is known the world over. Send for Descriptive Catalogue.

HUSSEY'S "NEW MODEL CENTENNIAL," WITH LEVER.

Send For Descriptive Circular.

Syracuse Spike Tooth Cultivator.

Especially adapted to pulverize the soil and leave it smooth and level. The teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth.

No. 114.—Expanding Lever, fourteen Spike Teeth and Wheel......\$5.00

SYRACUSE 1-HORSE SPRING TOOTH HARROW.

Frame of steel similar to 2 Horse Harrow and is the best 1 Horse Harrow in the market.

10 Tooth with Lever. Price, \$10.00.

THE "PLANET JR." WHEEL HOES.

The "Planet Jr." Double-Wheel Hoe, Cultivator, Rake and Plow Combined.

The "Planet Jr." Double-Wheel Hoe is compact and rigid. The equipment consists of-

I pair of curved point hoes,
I "" " rakes,
I "" " plows,
I "" " detachable leaf guards.

The "Planet Jr." Single-Wheel Hoe, Cultivator, Rake and Plow Combined.

This Single-Wheel Hoe is considerably lighter than the Double, and does almost the same variety of work; the attachments are nearly identical. Owing to its lightness, it is more pleasant to some than the Double-Wheel Hoe. Price...........\$4.50. Send for Descriptive Catalogue of "Planet Jr." Goods.

The "PLANET JR." Combined Drill and Wheel Hoe

This is the most popular combined tool known; and its friends have been gained by substantial merit alone. It won the highest and only award at the Chicago Exposition.

This combined tool has a complete set of cultivating tools, and all its operations are rapid, easy, perfect and delightful. When used as a Drill the seed is sown with great regularity and at uniform

depth, regulated at pleasure. The hopper holds one quart. From a Drill it is changed to its other uses by unscrewing but two bolts, when any of the attachments shown in the cut can be instantly attached. In short, every purchaser of this machine will find it an excellent seed sower; a first-class double wheel hoe for use when plants are small; a first-class single wheel hoe; and excellent furrower; an admirable wheel cultivator; a capital garden rake; a rapid and efficient garden wheel plow.

Price, \$9.00.

Send for Descriptive Catalogue of Planet Jr. Goods.

This has been perfected to meet the demand for a low priced drill. It has all the essential qualities of the larger and more expensive drills, the Seed, Dial and Indicator being made from exactly the same patterns.

This drill does not have the new seed cut-off, but the Agitator can be checked same as in the larger drills.

Manufr's Price. R. B. D. & Co.'s Price
Price\$7.00. \$5.00

NONE BETTER CAN BE PROCURED. Medals and testimonials confirming its superiority over all other Drills have been repeatedly bestowed upon it from all quarters, and as it has been improved from time to time it is now everywhere acknowledged to be THE MOST PERFECT DRILL MADE. It has been many years in use, and its still increasing sale is the best evidence of its merits. Send for Descriptive Circular.

This desirable combination of the Garden Drill already described with the new Universal Cultivating Attachments is one which cannot fail of recommending itself to all. The seeding and covering apparatus can be readily removed when the implement presents much the appearance of the New Universal Single Wheel Hoe, Cultivator and Plow.

Manuf'r's Price, \$11.50. R. B. D. & Co.'s Price, \$9.00.

Matthews' New Universal Model Combination Drill.

This is the same machine as described on page 46 and has the same cultivating attachments. It can be used either as a Double Wheel or Single Wheel machine, and change can be readily made. We do not particularly recommend a two-wheel seed sower, as the nicer work may be accomplished by a one-wheel machine. The two wheels are desirable however when used as a cultivator or wheel hoe, as in this way the rows of YOUNG plants may be straddled and the cultivating done on both sides of the row at one passing.

Manufr's Price, \$12.50.

R. B. D. & Co's Price, \$10.00

Manuf'r's Price, \$12.50.

R. B. D. & Co.'s Price, \$10.00.

PLIMPTON'S STEEL GOODS.

Price, 50 Cents. Pat. Toothed Socket Hoe.

We carry a full line of Plimpton's steel goods. Hoes, Hay Forks, Manure Forks, etc. In style, temper and finish these goods are superior to all others.

NATIONAL REVERSIBLE SULKY PLOW.

This plow is not an experiment, having been placed upon the market several years since, in which time there have been several thousand sold. Unlike all other makes of Riding Plows, the National has been especially designed to meet the wants of Eastern farmers, and succeeds not only upon level farms, leaving them without tracks or dead furrows, but is equally adapted to stony, rough side hill farms, turning the land with the slope, and not up the hill as is the case with all one-way Sulky Plows.

We believe the National to be the only Sulky Plow in the world that can justly lay claim to being a success for all kinds of works and in all varieties of soil.

PRICE, \$55.00. .

Including Neck Yoke, Evener and Whiffletrees. Also extra Plow and Jointer Points.

Send for descriptive circular.

... POST'S IMPROVED EUREKA SAP SPOUT.

WITH PATENT AIR TRAP.

This is the only Sap Spout that is made on strictly scientific principles. They are the most simple, durable and economical. They apply to the tap hole in the tree firmly and without leakage or breakage and obstruct no pores of timber.

Price, per hundred. \$2.50

The Yankee Swivel Plow.

The Patented Adjustable Clevis with Steel Lever, holding the same firmly in position by iron notches between the handles, as shown in cut, enables the plowman at all times to cut a uniform width of furrow without stopping his team. The excellence of such an arrangement will be apparent to all, especially in view of the fact that heretofore reversible plows, as usually made, have no means of adjustment of any kind, and have frequently been condemned in consequence. Not only is this attachment so easy of operation that a child can manage it, but being of extremely simple construction it will never get out of order.

The Lightning Churn.

This has been made to supply the demand for a small cheap churn. It is strong and durable, with no parts to get out of order.

It has a double dasher, quick-acting, compact and efficient in design, and neat and durable in finish. A little higher cost than the "Cylinder Churn," but vastly superior to it in every way.

The Blanchard Churn.

The following are the leading merits of the BLANCHARD CHURN:

Perfect quality of all materials used. Excellence of manufacture. Simplicity of construction, having no cog wheels or gearing. Durability. Ease of operation. The action of the dasher is such as to cause agitation of the cream by creating currents, and not by beating or by friction of the cream which may injure the grain of the butter. Facility in removing the dasher and getting at the butter. Ease of cleaning, the form of construction making the inside without any inaccessible or invisible angles or corners.

The Blanchard Butter Mold

These molds are carefully made of clear white birch, and only brass hooks and screws are used throughout, so that there is no possibility of rust and consequent discoloration of the wood. The ornamentation is done by special machinery, and when desired, initials, monograms, etc., are substituted at a slight advance in cost. Each division on face of mold represents one-quarter pound of butter.

THE BLANCHARD Print = Butter = Carrier.

This carrier is designed more especially for the use of dairymen who deliver their butter directly to the consumer, though they are largely used for express shipments, and are substantially made so as to withstand considable rough treatment. The trimmings are japanned throughout; the covers are strongly cleated and hinged; the corners are dovetailed; the finish first-class.

We recommend this carrier as exactly the thing for use in the local trade of dairies and small creameries.

The Blanchard Butter Package.

This is a round, firm, clean, handsome and cheap package in which to send butter to market. It has a strong metal corner on the top and bottom which cannot possibly come in contact with the butter. The wood from which it is made is thoroughly steamed before working, which makes it as nearly odorless and tasteless as possible. We ship them in neat, strong, wooden crates, the slats of which may be removed and again returned to place after the boxes have been filled with butter.

THE NEW DR. BAILEY CUTTERS,

FOR ENSILAGE AND DRY FORAGE.

Greatest Capacity, Strongest, Requires least Power. Superior to any Cutter in the market, not only for cutting Ensilage Crops, but also for Hay, Corn Stalks and other Dry Forage. Only Machines made with a Drawing and Shearing Cut. Great saving of Power and Increase of Capacity. Six Sizes, for Hand and Power.

These machines have been greatly improved, our present line of six sizes all being made after the latest and most approved designs, and under best methods.

Many advantages possessed by the Dr. Bailey Cutters cannot be claimed by any other cutter made. Greater capacity than any other using the same power. Strength, simplicity, durability, and rapidity are among their qualifications.

The peculiar and advantageous arrangements of the cutting apparatus is fully illustrated above. The capacity of our cutters is not limited or governed by the length of knives, as it will be readily seen that all fodder once under the knives on the powerful main wheel must be cut. This feature is peculiar to this machine, for on all cylinder machines and machines with covex radiating knives, the greatest space between knite and cutting bed is necessarily very much contracted.

and cutting bed is necessarily very much contracted.

These machines are giving entire satisfaction, and the ever-increasing demand shows their great popularity.

The Perfection Barrel Swing.

An invention for swinging a barrel in a pantry, cupboard, or under the counter or broad shelf in a Hardware or Grocery Store. Saves the annoyance of removing the moulding board and other-things from the broadshelf to get at the flour barrel. It will easily swing the largest barrel containing 400 lbs. Undoubtedly the best thing of its kind that has ever been put on the market.

Price.....\$1.25.

ROYAL FEED CUTTER.

This is the strongest, simplest, easiest working, and of the largest capacity of any in the market. It has a new and rigid adjustment for keeping the knife up to the bed plate. It will not hang off after use, as is the case with all other makes of cutters. The bearings are all Chilled Iron, will not wear out, and are the easiest adjusted of any made. The knives are made from the best Cutlery Steel.

Prices......from \$3.50 to \$6.50

WHITMAN'S SLIDE TABLE WOOD-SAWING MACHINE.

This machine is designed for sawing wood for fuel. The wood is placed on the sliding frame on top of the machine, against the small uprights, and then pushed with the frame up to the saw; when cut, the frame with the stick is withdrawn and ready for the renewed operation. It is easily driven by a one or two horse power.

The saw is 24 inches in diameter, filed and set ready for use.

Price.....\$40.00.

Weight.....310 pounds.

WHITMAN'S Root and Vegetable Cutter.

This is the best machine for cutting all kinds of roots for feeding stock. It cuts the roots into small regular sized pieces, leaving no piece large enough to choke sheep. The knives can be adjusted to cut coarse or fine, as desired. It will cut one bushel of roots per minute with ease.

Price \$9.00

CHAMPION Root and Vegetable Cutter.

This machine is made with a wrought shaft with sections of knives fastened to it, and arranged so that a rotation of knives are continually passing a bed knife with cross knives passing between the section of knives; cutting always near the centre shaft, making it cut easy and fine enough for cattle or sheep; also making a very regular cut. It will cut one bushel of roots per minute.

Price\$6.00

Whitman's Monitor Cider Mills.

Several improvements have been added, such as New Hopper, the Rolls made longer and larger in diameter. New a djustable Crusher or Breaker Roll which increases the capacity. Grinds the fruit coarse or fine as the grinders are adjustable.

Wine And Lard

Presses.

The Johnson Fan Mill.

The Fan Mill is indispensable to a well regulated Grain Barn. This mill runs the sound clean grain to one side of the Mill, while the sand and small seeds pass out at the other, and the heavy chaff and heads are caught in a receptable behind the machine. It will not only clean grain, but also grass seeds in the best manner.

Manufacturer's Price......\$18.00. R. B. D. & Co.'s Price......\$16.00

Whitman's Barrel Header.

THE THOMAS PUMPS.

The "Thomas" Line of Pumps Comprises Three Distinct Kinds.

The Thomas Double-Acting Force and Lift Pump.

Ist.—"Thomas" Lift Pumps.— Made in four sizes—2 1-2, 3, 3 1-2 and 4 inch Brass Cylinders; 5 1-2 feet set length, unless otherwise ordered. These Pumps simply lift the water up out of the well, and let it run out of the spout, but will not force the water anywhere.

2d.—"Thomas" Double-Acting Force and Lift Pumps. - These Pumps are made with two brass cylinders, and they not only lift the water up to the spout, but they will also force it in any direction want it to go, and they will lift and force the water on both the up and down stables of the the up and down strokes of the handle—and this is why it is called a Double-Acting Pump—giving a splendid and continuous stream of water.

These pumps are made in five sizes-2, 2 1-2, 3, 3 1-2 and 4 inch brass cylinders, and are adapted to any depth of well up to 200 feet.

This is the finest pump ever made, and gives unbounded satis-

faction. Try it.

Made also with the Wind Mill Top, and with Normand's fine threeway cock.

Made with 5 1-2 feet set length, unless otherwise ordered.

"Thomas" Upper Force and Lift Pumps. — This is our low priced, single acting force pump. This Pump lifts and forces the water, but only on the down stroke, and this is why it is called a Single-Acting force pump.
Made in five sizes—2, 2 1-2, 3,

3 1-2 and 4 inch brass cylinders, and with stop cock on side, so pump can be used same as a three-way cock, and with 5 1-2 feet set lengths,

unless otherwise ordered.

Barrel Spray Pump.

The Farmer's Favorite

POTATO BUG EXTERMINATOR

FOR APPLYING PARIS GREEN, SLUG SHOT AND OTHER INSECTICIDES IN THE DRY STATE.

The cut shows the manner of using (the strap to go over the shoulder we do not furnish.) The long handle is not to be shaken, the hand upon the same acts merely as a balance, and to thrust the "duster" out over the plant or row. The hand upon the can is used to turn the same, and as a wheel is fastened to the long handle, a shower of dust is forced through, light or heavy, according to the length of the turn given, from eight to twenty-four inches may be covered as desired.

The best machine in the market for applying poisons mixed with plaster, etc.

Price.....\$1.25.

Lion Brand Bordeaux Mixture.

This mixture is a scientific preparation and combined in a manner heretofore unknown, thus enabling the manufacturer to place it on the market in practical and usable shape, as by simply adding water and stirring, it is ready for use.

One gallon WILL MAKE 50 GALLONS by the addition of 49 gallons of water. Actual cost to you when ready for use, 2 cents per

gallon.

Potato Rot, Potato Blight, Downey Mildew and Anthracnose of Crape, Peach, Pear, and Cherry Blight, &c.

Whitman's New Adjustable Lever Weeder.

The above cut represents the latest adjustable lever Weeder. This Weeder differs materially from all others, it having a Lever Adjustment that by simply turning a handle nut the teeth can be instantly adjusted from a vertical position to any inclination desired without stopping the horse, if necessary. This feature will be appreciated by those using other makes of weeders.

By using this Weeder in fields, corn. beans, potatoes, in fact any kind of vegetables can be kept clean of weeds without the labor and expense of the hoe and without damage to the plants. One trial will convince any farmer that he cannot afford to be without this implement.
